

## Green Power Group Pushes Expansion to Aceh, Deputy Governor Fadhlullah Highlights Investment Potential

**Jakarta, July 4, 2025 — Green Power Group** warmly welcomed the investment invitation extended by the Deputy Governor of Aceh, Fadhlullah SE—commonly known as Dek Fadh—during an official meeting held at the World Capital Tower, Jakarta. The meeting was also attended by the Mayor of Subulussalam, H. Rasyid Bancin; the Regent of South Aceh, H. Mirwan, MS, SE; and the Regent of Nagan Raya, Dr. TR Keumangan, SH, MH.

This meeting served as an important moment to discuss potential investment collaborations in the new and renewable energy sector, particularly in the Barsela region, which is known for its abundant natural resources, including hydropower, geothermal energy, and biomass.

In his presentation, the Deputy Governor emphasized the abundant natural resources of the West-South Coast of Aceh (Barsela), covering Subulussalam, South Aceh, and Nagan Raya. He reaffirmed the commitment of both the Provincial and Regional Governments to:

- Facilitate the licensing process in accordance with national regulations.
- Provide legal certainty for investors in the renewable energy sector.
- Support the creation of green jobs and the transfer of technology.

*“We are very open to investments that bring positive impacts to the community. Aceh holds tremendous untapped potential, and we are ready to support every step taken by Green Power Group in realizing clean energy projects in our region,”* said the Deputy Governor.

As a publicly listed company focused on the development of renewable energy and sustainable technology, Green Power Group sees Aceh as a strategic location for expanding its green project network across Indonesia. The support from local governments and the availability of natural resources serve as key assets in fostering a healthy and impactful investment ecosystem.

Green Power Group carries the mission to:

- Develop environmentally friendly power plants based on local potential.
- Establish collaborations with national and international partners for technology and knowledge transfer.

President Director of Green Power Group, An Shaohong, expressed his appreciation:

“Collaboration with the Aceh Government aligns with our vision to expand access to clean energy across the Indonesian archipelago. We are ready to conduct an in-depth feasibility study and engage global partners to ensure that the benefits are directly felt by the local communities.”
